

## Introductory Tour: Coal Country

As you view the Coal Country Google™ Earth tour, answer these questions on the next page(s) of your notebook.

- A. Stop 2b:  
Is this a natural lake or one formed by a dam?  
  
What do you look for in order to recognize a dam?
- B. Stops 2d and 3a:  
What are the distinguishing features of coal mines that allow you to identify them in an aerial view?  
  
C. Stop 5c, view 3:  
How did the island in the Bluestone River form?  
  
D. Stop 6:  
How many mines can you see in the Montcoal area?  
  
E. Stops 6b through 6k:  
What details can you see in the mine areas? What are the zigzag lines? Describe features that could be vehicles or buildings. How do you tell which direction is uphill and which direction is downhill—which parts are higher elevation and which are lower elevation?  
  
F. What questions do you have about this region?
