

## PLATE VOCABULARY .....

**Divergent Boundary:** Where plates move away from each other.

**Convergent Boundary:** Where plates move towards each other.

**Transform Boundary:** Where plates move past one another.

**Convection:** The rising and falling of fluids, like the mantle, due to heating and cooling.

**Subduction zone:** Places along a convergent boundary where one plate moves under another plate.

**Mid-Ocean Ridge:** Mountain ranges that form on the ocean floor along a divergent boundary.
